

Software Engineer – Demo Team

We are looking for a Software Engineer to join our Demo Team. You will join a multi-disciplinary team, working under the supervision of a Senior Software Engineer, assisting with all demo-related projects, including set-up and coding, from our award winning, state of the art studio, [Live Works](#) on Newcastle Quayside.

You will liaise with the ZeroLight Development Team to develop technical demos, working to ensure that the company has a suite of outstanding technical demos to showcase our technology in the best possible way. You will ensure that demo set-up runs smoothly and that any problems arising in remote set-up situations are resolved quickly. You will need to have a good technical understanding of the components required to run our demos and a genuine passion for technology. Excellent problem-solving skills and resourcefulness in sometimes challenging situations is a must.

Technical requirements will include:

- To develop, write, debug, and implement system code and authoring tools.
- Write clear, maintainable, and portable code.
- Test and refine project features throughout the development cycle of the project.
- Development of android and iOS applications.
- Graduate in relevant discipline able to demonstrate skills through demos / examples of work and source code.
- Excellent problem-solving skills illustrated through strong debugging ability.
- Experience of collaborating with other programmers, either in previous commercial environment or at university.
- Experience using Unity is preferred.
- Strong interest in visualisation and virtual reality, passionate about technology

There is extensive worldwide travel involved in this role. You will be showcasing ZeroLight technology at conferences, tradeshows and client meetings on a regular basis, acting as support to our Commercial & Marketing Teams (who will lead all presentations / meetings), setting up technical demonstrations (often from scratch in conference centres) and helping to present these to clients, investors and commercial partners. In these settings you can go from manual set-up tasks to discussing complex details with high profile clients in a matter of hours. A confident approach to interacting with a range of individuals is key to this role.

This role requires a high-energy individual with a positive and can-do attitude to all tasks. Being both a coding and a client facing position, the ability to switch gears and change your approach to the working environment is a definite plus.

You will be a clear, confident communicator when carrying out demonstrations, with particular proficiency on the technical aspects of what is being presented. You will be an enthusiastic ambassador for ZeroLight products, with an awareness of our commercial priorities.

To apply for this position please send your CV and Cover Letter to careers@zerolight.com
